SUMMARY
Principal Java Architect with extensive experience leading distributed cloud platforms.

TECHNICAL PROFICIENCIES
Java, Spring Cloud, Kafka, Docker, Kubernetes, AWS, PostgreSQL, MongoDB, Reactive Programming

CORE EXPERIENCE
Lead Architect | Gotham FinTech Solutions (2020 - Present)
- Led team of 15 engineers designing multi-tenant wealth management platform.
- Transitioned monolithic architecture into 25 microservices running on AWS EKS.

Gotham FinTech Solutions (Continued)
- Designed high-throughput Kafka ingestion engine handling 100M events/day.
- Implemented zero-downtime blue/green deployment strategies.

Senior Java Engineer | Manhattan Data Systems (2016 - 2020)
- Built distributed low-latency algorithmic trading feeds in Java.
- Optimized JVM garbage collection reducing p99 latency by 65%.

EDUCATION & CERTIFICATIONS

Master of Science in Distributed Systems | Columbia University (2016)

Bachelor of Science in Computer Science | NYU (2014)

CERTIFICATIONS

- AWS Certified Solutions Architect Professional (2022)
- Certified Kubernetes Administrator (CKA) (2021)
